Objective

Motivated undergraduate computer science student with a solid foundation in the MERN stack (MongoDB, Express.js, React, Node.js). I am eager to leverage technical skills in a collaborative environment through an internship opportunity, contributing to real-world projects while further developing my expertise in full-stack web development.

Technical Skills

- **Languages:** JavaScript, HTML, CSS, C/C++
- **Frontend:** React.js, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, SQL
- **Tools & Technologies:** Git, GitHub, npm, JWT Authentication
- **Soft Skills:** Problem-solving, adaptability, collaboration, teamwork

Project 1

Name: [Docly](#) [only frontend deployed]

Docly is a web-based document management platform built with React, Node.js and Express, enabling users to securely create, update, and delete documents. Using JWT authentication, it ensures only authorized users can access and manage their documents. It's code was in my github account so anyone can check it out.

Project 2

Name: Sajilo Rent

Sajilo Rent is a web-based rental system developed with the purpose of connecting the people to the vendors and developing a renting community. The platform serves as a management tool that allows vendors to list items for rent. It's code was in my github account so anyone can check it out.

Education

BSc. Computer Science and Information Technology (CSIT) [In Progress]

Tribhuvan University, Kathmandu | Expected Graduation: [Dec, 2026]

Relevant Coursework: Web Development, Database Management, Algorithms, Data Structures.
